AYANANTA CHOWDHURY

Designing documentation that AI systems can understand, reason over, and use

AI Information Architect* | Enterprise *Knowledge Systems Architect

Location: India

Mobile: 9730821120 **Email**: ayananta.chowdhury@gmail.com **LinkedIn:** https://www.linkedin.com/in/ayanantachowdhury/

Website: https://ayananta.github.io/Digital-Resume/

Professional Summary

AI Information Architect with **15+** years of experience in designing intelligent content (smart content), authoring product and API documentation, building scalable information architecture, and formulating content strategies. Built a real-time, proactive agentic user-assistance system in my previous organization by transforming existing documentation into semantically enriched, structured content, which machines can read, reason over, and act upon.

Work Experience

HCL Technologies | Senior Technical Manager – User Assistance (Mar 2023 – Apr 2025, Remote) Fulltime

Impact: Modelled the existing product knowledge of a SaaS ERP software from SAP to enable AI-assisted real-time guidance. And reduced content redundancy by 11% using TEXTML queries, conkeyrefs, and keyrefs.

Key Contributions

- Extracted named entities automatically using specialized NLP tools and normalized terminology using OpenRefine.
- Built a glossary with canonical terms and recorded allowed and deprecated variants. Specified “preferred”, “admitted”, and “deprecated” terms in Acrolinx for real-time authoring guidance.
- Generated taxonomy facets using Carrot^2 clustering.
- Designed a taxonomy on Protégé, defining concept schemes, top concepts, and concepts, and asserting object and data properties. Also, recorded the preferred, alternative, and hidden labels for each concept.
- Structured existing documentation into atomic knowledge units, where each unit addressed one user intent or idea.
- Enriched the documentation with semantic markups to make the content machine readable.
- Designed a content ontology by defining classes, data properties, and relationships between classes on Protégé.
- Audited existing product documentation to identify redundant knowledge and implemented content reuse.

Quincus | API Technical Writer (Oct 2022 – Nov 2022, Remote) Contractual for 1 month

- Explained API endpoints, resources, methods, authentication protocols, parameters, and headers (logistics domain).

SugarBox Networks | Technical Communications Manager (Aug 2020 – Sept 2022, Remote) Fulltime

Impact: Designed an efficient content navigation structure and a faceted search knowledge base platform. And successfully quickened onboarding time by 31.4% by creating tailored user guidance.

Key Contributions

- Built a term base—containing curated terminology and developed a terminology governance framework.
- Designed a multi-faceted taxonomy and enforced metadata implementation designing Schematron rules.
- Built a content ontology by modeling domain concepts, properties, and their interrelationships.
- Managed documentation backlog, content planning, doc task workflow in JIRA.
- Measured customer success by assessing documentation effectiveness using Google Analytics, Hotjar, and Algolia.

HCL Software | Technical Writing Senior Consultant (Nov 2018 – Mar 2020, Pune) Fulltime

Impact: Streamlined the documentation workflow to align with the CI/CD release cycle for a data engineering platform.

Key Contributions

- Led the documentation team and mentored team members on topic-based authoring.
- Drafted Hotfix docs and release notes for a data-engineering solution and wrote a variety of UI texts (microcopy).
- Added parameter descriptions in the Open API Specification file and wrote the conceptual part of API documentation.

Sungard Discovery Services | Specialist, Technical Documentation (May 2017 - Jul 2017, Pune) Fulltime

- Produced video tutorials for the company's LMS platform, explaining the capabilities of a disaster recovery product.

Persistent Systems | Information Development Team Lead (Nov 2013 – May 2017, Pune) Fulltime

- Produced demo videos of medical device MVPs for potential investors (life sciences & healthcare domain).
- Coordinated with cross-functional teams of Merck & Co. for ITIL-based change management, using ServiceNow.
- Collaborated with the VMware on-site team to author the user and quick start guide for vRealize Network Insight.
- Ensured content followed WCAG 2.1 accessibility standards. Did usability testing to verify content accuracy.

Rolta India | Senior Technical Writer - Product Documentation (Aug 2012 – Jul 2013, Mumbai) Fulltime

- Authored content to explain new features developed for a GIS product using a single-sourcing tool, following Agile.

Polaris Software Lab | Technical Writer (Oct 2010 – Aug 2012, Mumbai) Fulltime

- Co-authored user and installation guides for a banking solution that processed cross-border transactions via SWIFT messaging, complying with NACHA standards for ACH transfers, and ensuring accurate fund settlements.

Connectiva Systems | Technical Writer (Feb 2008 – Sept 2010, Kolkata) Fulltime

- Built storyboards for eLearning videos (telecom domain), edited corporate training PPTs, and updated the user guide.

- **Compare Infobase** | **Content Writer** (Jan 2007– Dec 2007, Kolkata) - Wrote SEO content for travel websites.

Education: Postgraduate in Mass Communication and Journalism, Calcutta University | 2005–2006

Competencies - Skills

ENTERPRISE KNOWLEDGE MANAGEMENT FOR AI RETRIEVAL

- Rich taxonomies - Simple Knowledge Organization System (SKOS)
- Ontologies - Web Ontology Language (OWL)
- Simple taxonomies - RDF Schema (RDFS)
- Knowledge graph model - Resource Description Framework (RDF); SPARQL queries
- Syntax - XML, Turtle

ARTIFICIAL INTELLIGENCE

- RAGs and Langchain
- Agentic AI
- Agentic RAG
- Machine Learning
- Natural Language Processing
- Generative AI

CONTENT STRATEGY AND DEVELOPMENT

Study and analyze the target audience to create user personas, journey maps, and workflow diagrams. Define KPIs for successful user assistance, measure help success, create a master documentation list with timeliness, and mentor teams. Author and design multimodal help content enabling users to set up, operate, and maintain enterprise applications through video tutorials, guides, and visual learning assets such as diagrams, infographics, and workflows. Author release notes, hotfix doc, FAQs & troubleshooting, and training materials. Produce SEO-optimized (E-E-A-T) marketing content and edit SOPs, runbooks, process documentation, and functional & technical specifications to align with Microsoft Manual of style (MSTP) guidelines. Embed assistance (microcopy, UX writing) and walkthrough videos (digital guided tours) on UI.

API DOCUMENTATION

Deliver exceptional developer experiences through structured API documentation with interactive examples.

LANGUAGE / DATA FORMAT: JSON, XML, YAML, Markdown, HTML (working knowledge), Python (only familiarity)

Tools

Information Architecture: IxiaSoft, SpaCy, Open Refine, Carrot^2, Protégé | **Docs-as-Code**: Git, Markdown | **Audio-Visuals & Diagramming**: Camtasia, Visio, Napkin, HeyGen, and Lucidchart | **Analytics**: Google Analytics, Hotjar, and Algolia | **Authoring**: DITA XML Editors (Oxygen, Arbortext), RoboHelp / MadCap Flare, Confluence, Docs, MS Office | **DAP**: WalkMe | Project Management/Ticketing ITSM: JIRA, ServiceNow | **API Documentation**: Swagger, Postman | **Vibe Coding**: Cursor AI

Certifications: Taxonomy and SKOS, DITA XML Authoring | UX Writing | API Documentation | Camtasia | Git
